Dear Mr. Chairman:

Enclosed is the annual report on measures to protect the identities of covert agents as required by Section 603 of the National Security Act. This report is based on information provided by the Director of Central Intelligence, who is prepared to respond to any questions that you may have.

Sincerely,

Enclosure
Annual Report

cc: The Director of Central Intelligence

The Honorable Barry M. Goldwater
Chairman, Select Committee on Intelligence
United States Senate

ANNUAL REPORT ON MEASURES TO PROTECT
THE IDENTITIES OF COVERT AGENTS

Enactment by Congress of the Intelligence Identities Protection Act in 1982 continues to be the most effective measure taken to date to protect the identity of our intelligence officers from purposeful unauthorized disclosure. Those groups of individuals that had earlier engaged in a pattern of public exposures of alleged CIA personnel have not resumed the practice. There are indications--albeit inconclusive--that some of the individuals have carried on their effort via third parties to effect exposures outside the jurisdiction of that law. In retrospect it is often difficult to distinguish in the end result between the degree of effectiveness of these individual efforts and those of hostile foreign intelligence services. Public exposures abroad are becoming less accurate with the passage of time as the effectiveness of improving cover techniques begin to be felt, the corps of new, previously unexposed personnel being posted abroad increases, domestic based media refrains from publication of identities, and the initial data base used by hostile persons and services becomes increasingly stale from lack of current input. (S/NF)

The ever present threat posed by such hostile entities has been augmented, especially during the past year, by escalating terrorism directed at official establishments, including cover installations. Indications are that individually-targeted terrorist acts will increase at least in some areas, and the need for identity protection will be even more critical. Thus, CIA, FBI, and DOD continue their search to improve methods of concealing and protecting identities. Accomplishments during 1983 included successful initiatives to two additional federal agencies for broadening cover placements. In 1983, cover arrangements were substantially increased in official, non-official, and commercial areas over 1982 levels. As in the past, CIA is not using the Peace Corps for cover. (S/NF)

Much of the planning for improvements during 1984 consists of administrative and technical changes to existing mechanisms. The Director of Central Intelligence would be happy to arrange briefings for Committee members on the details concerning these changes or on any other aspect of this report. (C)
